SMARTBRIDGE PROJECT SUBMISSION

Auto Ticket Classification using Flow Designer

PHASE 1

Brainstorming & Ideation

Date	**30 September 2026**
Team Id	**SWTID-2026-4922**
Team Leader	**Mohamed Saheen**
Team Members	**Rohith C P,Maha lekshmi E K, Nowfal A, Abishek X**
Project Name	**Auto Ticket Classification Using Flow Designer**

Technology: ServiceNow – Flow Designer

Role/Project Area: ServiceNow Administrator

1. Project Title

Auto Ticket Classification using Flow Designer

2. Problem Statement

The school IT helpdesk receives multiple incident requests daily from students and teachers, such as Wi-Fi issues, projector failures, password problems, and slow computers. Currently, IT staff manually review each request and assign a category. This manual process is time-consuming and inefficient.

3. Proposed Solution

The proposed project uses ServiceNow Flow Designer to automatically classify IT support tickets based on keywords present in the short description and description fields.

4. Objectives

- Automatically classify incidents at the time of creation.
- Reduce manual effort for IT agents.
- Improve ticket routing efficiency.
- Implement a no-code and easily maintainable solution.

5. Expected Outcome

When a student creates an IT support ticket, the system automatically identifies the issue and assigns the appropriate Category and Subcategory. The system also sends an automated email notification to the caller after ticket creation.

Screenshot requirement: No ServiceNow screenshot is required for this phase. This phase documents the project idea and objectives.
