SMARTBRIDGE PROJECT SUBMISSION

Auto Ticket Classification using Flow Designer

PHASE 8

Project Demonstration

Date	**30 September 2026**
Team Id	**SWTID-2026-4922**
Team Leader	**Mohamed Saheen**
Team Members	**Rohith C P, Maha lekshmi E K, Nowfal A, Abishek X**
Project Name	**Auto Ticket Classification Using Flow Designer**

Technology: ServiceNow – Flow Designer

Role/Project Area: ServiceNow Administrator

1. Demonstration Objective

The final demonstration should explain the project, show the ServiceNow implementation, demonstrate ticket classification, and present the final output.

2. Required Demonstration Content

- Project Name
- Purpose of the Project
- Use and Benefits of the Project
- Project Execution / Working Process
- Final Output

3. Demonstration Flow

- Introduce the project title: Auto Ticket Classification using Flow Designer.
- Explain the problem of manually classifying school IT support tickets.

- Explain that ServiceNow Flow Designer automates classification using keywords.
- Open the Incident Workflow table.
- Create or open a ticket with an example short description.
- Show the automatically assigned Category and Subcategory.
- Show the Flow Designer execution and classification logic.
- Show the email notification generated for the caller.
- Explain the final result and benefits.

4. Simple Voice-over Script

Good morning everyone. My project title is Auto Ticket Classification using Flow Designer. The purpose of this project is to automatically classify IT support tickets in a school helpdesk. Normally, IT staff need to manually identify the issue and select the appropriate category and subcategory. This project reduces that manual effort using ServiceNow Flow Designer.

The system checks the short description of the ticket and identifies keywords such as WiFi, Projector, Password and Slow. For example, a WiFi issue is classified as Network and Wi-Fi. A projector issue is classified as Hardware and Projector. A password or login issue is classified as Access and Forgot Password. A slow computer issue is classified as Performance and Slow Computer.

After classification, an email notification is sent to the caller. Now I will demonstrate the complete working process and show the final output. Thank you.

5. Final Video Submission

Record the complete project demonstration with screen sharing and your voice-over. Upload the video to Google Drive and set the sharing permission to **Anyone with the link – Viewer**. Put the Google Drive link in a text file named **Demo-Video-Link.txt** and upload it to the Phase 8 GitHub folder.

Screenshot note: The two supplied screenshots are intentionally placed in Phases 5 and 6, where they provide the most relevant evidence.
